

Oil Field Environmental Incident Summary

Incident: 20161011105915 **Date/Time of Notice:** 10/11/2016 10:59

Responsible Party: Oasis Petroleum

Well Operator: OASIS PETROLEUM NORTH AMERICA LLC

Well Name: 5892 30-29 CTB (PARADISE CTB)

Field Name: COTTONWOOD

Well File #:

Date Incident: 10/10/2016 **Time Incident:** 13:30 **Facility ID Number:** 219628-01

County: BURKE **Twp:** 158 **Rng:** 92 **Sec:** 30 **Qtr:** NW NW

Location Description: Pipeline ruptured in the SW corner of location. Allowing 10 bbls to flow into the ditch to the West and onto ROW to the South. The rupture is from an old squeeze that was missed when we initially cut old squeezes out of our lines. We were 2 days from doing our integrity management test on this section of line.

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on location at 1700. The release is in Mountrail County. The pipeline area has been excavated, and it appears testing is occurring. I took some electrical conductivity (EC) readings in the excavated area and got some background levels and some higher levels. There is a spot off of the pad near the excavation that has visible staining and high EC readings. More follow-up is necessary. Photos can be found in the report folder.

Date: 11/3/2016 **Status:** Inspection

Author: Stockdill, Scott

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on location 12:25, 11/3/2015.

Spill ran off of CTB location to the south and southwest. Spill ran 100 yds downhill before terminating. Impacted soils are excavated; however, more work needs to be done to ensure proper cleanup. Contact company for sample results.

More follow-up is necessary.
